

Model :X400P

Asterisk card with 4 FXS/FXO modules

Features

- The **wildcard tdm400p** is a half-length PCI 2.2-compliant card that supports FXS and FXO station interfaces for connecting analog telephones and analog POTS lines through a PC.
 - It's a PCI Card for Asterisk, TrixBox and other Open Source Telephony projects with 4 modules.
 - The card is fully compatible with all analog Digium and other similar analog cards and modules with no changes to the drivers.
 - FXO modules are used to plug existing analog telephone lines into your phone system.
- With the Asterisk card TDM400P, Open Source Asterisk PBX software and a standard PC, users can create a Small Office Home Office (SOHO) telephony environment which includes all the sophisticated features of a high-end PBX/Voicemail platform.

Scalable and Effective SOHO Solution, Target Applications
